How to do a backup directly from your DVR/NVR

- 1. Plug in a flash drive to the USB port located on the back or front of the DVR/NVR.
- 2. Go to the main menu on your monitor (located in the bottom left corner).
- 3. Click search and backup.

4. Click by event.

Q Search and Backup			
	By Time-sliced Image	By Time	By Event
			×

5. Enter the start time and end time of the incident you would like to back up.

6. Click on which cameras you would like to backup.

- 7. Click search.
- 8. Choose which files you would like to back up and select Backup at the bottom.
