

# WiFi Stealth Camera Instructions

- 1) On your smart device (tablet or smart phone) install the app "HIDVCAM."

**Android** – Google play store

**iPhone** – App store

**\*You must first open the app and register for an account before proceeding.**

- 2) Insert your micro SD card into the micro SD card slot on your Wi-Fi camera. (Don't force it)
- 3) Plug the camera into an outlet, push the power button to turn on and wait 3 minutes for the device to fully power up and turn on (indicated by a flashing red / blue light).
- 4) On your smart device open settings and go to your available Wi-Fi networks .
- 5) On this list, locate the name of your camera's network (UID number). Your camera's network will begin with **IPC-** and then be followed by 8 numbers.
- 6) Connect to the camera's **network**.
- 7) Open the HIDVCAM app and the app will automatically connect to the camera. You will be prompted to create a password.
- 8) Once password is created click on the Settings option that has a gear next to it. This will bring you to the device settings. Click on Network.
- 9) A list of nearby Wi-Fi networks will appear. Choose the network you would like to connect the camera to and input the network password.
- 10) The camera will reboot. The reboot will take 2-3 minutes. The app will then indicate the camera to be "online" if done correctly.

## IMPORTANT SETTINGS

In the app click on the  symbol in the top right hand corner of the camera.
